SCTE · ISBE

Desert Chapter

Please RSVP for our upcoming Technical Session:

When: Wednesday, Sept. 27th, 2017

The presentation: CWDM/DWDM Applications for Residential and Commercial

Our presenter: Greg Scott is a technical sales account manager for Omnitron Systems specializing in telecom and MSO customers. Greg has a career that has spanned several technical roles including integrated circuit design engineering, manufacturing engineer, project engineering and sales engineering. He has over 18 years' experience in fiber access solutions including HFC, carrier Ethernet, WiFi, Small Cells, DWDM and CWDM. Greg holds a BSEE from University of California San Diego.

Location: This session is being produced by the SCTE/ISBE Desert Chapter and will also be webcast live to remote locations*. The **SCTE/ISBE San Diego Chapter** is hosting this webinar at strategically placed sites within the Charter and Cox properties. Additionally, to qualify your site for access to the webcast a conference room with a minimum of 5 attendees is required. Contact Dennis Kee, Chapter President to have your location SCTE-ISBE approved and listed as an access location. Approved sites and facilitators will be provided the Webinar link.
